

Mies

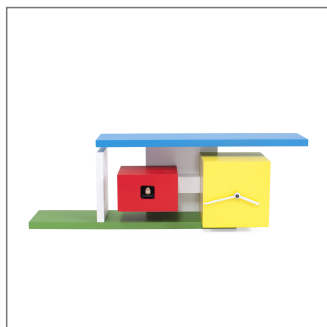

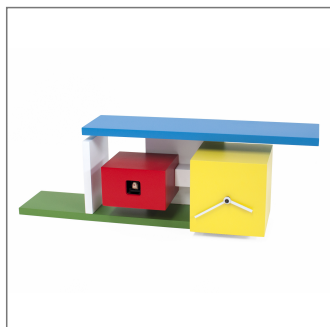

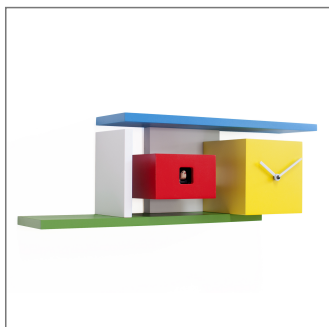

mod: 2450

design by Barbero Design

Studio Barbero, after the cuckoo Kandinsky, continues its tribute to great artists and architects by designing the cuckoo Mies, inspired by the works of the great architect Ludwig Mies van der Rohe. The set of simple lines and volumes arrange with elegance, underlined by the use of different colours that characterize the unique geometry of the cuckoo Mies, making it ideal for any room in the house. Produced with materials that respect the environment, it is finished with non-toxic paints. The cuckoo battery movement of German design has a photosensitive sensor that makes it not sing when it's dark, and there also buttons that allow you to adjust the intensity of the sound or turn it off altogether.
